About Cabot’s
Cabot’s Timber Finishes are the leading woodcare products in Australia. Since 1877 Samuel Cabot has manufactured a range of superior timber finishes. Cabot’s timber finishes are made in Australia with pride and offer a comprehensive range of stains, varnishes, clear finishes, oil, paints and polishes for the preservation and beautification of timber around your home. Cabot’s will help you to achieve a premium finish from an easy to choose range of products and provide you with step by step information on how to do the job properly.

For more information call our customer service team on 1800 011 006 or visit www.cabots.com.au
Knowing your timber

Before you begin to coat your timber, it is important to know exactly what it is. Taking this into consideration will help enhance your overall result.

<table>
<thead>
<tr>
<th>TIMBER TYPE</th>
<th>DESCRIPTION</th>
<th>COMMON USES</th>
</tr>
</thead>
<tbody>
<tr>
<td>Oregon</td>
<td>Oregon is an imported hard plantation timber that is easy to work with. It has a high resin content that can work its way out and crystallise on the surface of the timber. To remove, leave to dry then scrape off crystals before coating.</td>
<td>Pergolas and structural framing</td>
</tr>
<tr>
<td>Cypress*</td>
<td>Cypress is an Australian hard, knotty and fairly strong timber with a fine texture. It can be worked to a very high polish and takes most finishes well after de-oiling.</td>
<td>Flooring, panelling, decking, fences and structural timber</td>
</tr>
<tr>
<td>Radiata Pine</td>
<td>Radiata pine is a commonly available, easy to work Australian softwood plantation timber. It is ideal for staining.</td>
<td>Interior, wall or ceiling lining, boarding, plywood, particleboard and general construction</td>
</tr>
<tr>
<td>Jarrah</td>
<td>Jarrah is heavy and tough with a slight, pleasant odour. Jarrah can be highly polished and accepts most finishes well</td>
<td>Flooring, panelling, joinery and furniture</td>
</tr>
<tr>
<td>Western Red Cedar</td>
<td>Western red cedar is a pale to dark brown North American wood that is easy to work with. It is an extremely durable though very soft timber.</td>
<td>Weatherboards, fascias, windows, doors and garden furniture</td>
</tr>
<tr>
<td>Teak</td>
<td>Teak ranges in colour from golden to dark brown. It is rich in oils that help impart moderate durability and its characteristic waxy feel.</td>
<td>Interior and outdoor furniture</td>
</tr>
<tr>
<td>Merbau (Kwila)*</td>
<td>Merbau is an extremely durable hardwood and is most commonly used for timber decking. A rich-brown timber, it is resistant to termites and decay, but is susceptible to tannin bleed, which appears as a red-brown colour as water runs off the timber. It may require repeat applications of Cabot’s Deck Clean for exterior applications only.</td>
<td>Decking, fences, flooring and panelling</td>
</tr>
<tr>
<td>Brush Box*</td>
<td>Brush box is a hard, dense, light-brown timber commonly used in New South Wales and Queensland for interior flooring. It is resistant to wear however natural ‘waxiness’ can cause some adhesion problems with some strong solvent floor finishes, but otherwise it is a good timber for staining and coating.</td>
<td>Flooring, interior furniture, cladding and fences</td>
</tr>
<tr>
<td>Victorian Ash (Tasmanian Oak)</td>
<td>Victorian ash is a hard timber that has a uniform light beige to light pink colour and readily accepts stains and coatings.</td>
<td>Flooring, kitchen cupboards, wall panelling, and some interior furniture</td>
</tr>
<tr>
<td>Spotted Gum*</td>
<td>Spotted gum is a very dense, oily Australian hardwood. Note: Spotted gum is often presented in timber sold as ‘mixed hardwood’</td>
<td>Flooring, cladding, decking, fencing, landscaping, retaining walls and structural timber</td>
</tr>
</tbody>
</table>

*These woods are naturally oily and have a high tannin content.
Interior clears – doors, windows, trim and furniture

Finish: Natural/Transparent.

Cabot’s Cabothane Clear Water Based

Product description: Cabot’s Cabothane Clear Water Based is a clear polyurethane for doors, windows, trim and furniture. It is a highly durable, hard wearing and fast drying varnish

Features:
- No sanding required*
- High durability
- Fast recoat - 2 hours
- UV resistant - interior/ exterior durable
- Low odour & non yellowing

Sheen levels available: Satin or Gloss
Coverage: Up to 16m² per litre
Apply with: Brush or spray gun
Number of coats: 3 coats
Recoat: 2 hours
Clean up: Water
Use on: All interior timber excluding flooring

*No sanding required – refer to back of product for detailed instructions.

Cabot’s Cabothane Clear Oil Based

Product description: Cabot’s Cabothane Clear Oil Based is a clear polyurethane for doors, windows, trim and furniture. It is a highly durable, hard wearing varnish

Features:
- High Durability
- Resists stains & scratches
- Enhances timber grain
- Reduced odour & 6 hour recoat
- UV Resistant - Interior/ Exterior durable

Sheen levels available: Matt, Satin or Gloss
Coverage: Up to 16m² per litre
Apply with: Brush or spray gun
Number of coats: 3 coats
Recoat: 6 hours
Clean up: Mineral Turpentine
Use on: All interior timber excluding flooring

Cabot’s Danish Oil

Product description: Cabot’s Danish Oil is a penetrating oil for all interior furniture, doors, windows and trim. It penetrates to provide a protective natural matt finish

Features:
- Nourishes & protects
- Abrasion resistant
- Enhances natural grain
- Easy to apply

Coverage: Up to 10m² per litre
Apply with: Brush, roller or rag
Number of coats: 2 coats
Recoat: 6 hours
Clean up: Mineral Turpentine
Use on: All interior timber excluding flooring

No sanding required

Cabothane Clear Water Based eliminates the need to sand prior to coating pre-coated interior timber. Simply clean timber with Cabot’s Floor Clean and re-coat, see page 5 for detailed how to instructions.
How to complete an Interior Clears Project

How to apply Cabothane Clear Water Based

For bare interior timber:
Sand the surface smooth using 180-240 grit sandpaper.

For previously coated interior timber:
1. Thoroughly clean the surface with Cabot's Floor Clean and allow to dry.
2. Apply one coat of Cabothane Clear Water Based to a small test area.
3. Allow test area to dry for 2 hours, press sticky tape firmly to the surface and pull off quickly. If any coating comes off, the surface must be sanded.

Step 1
Surface preparation

Step 2
Apply the coating

1. Stir can thoroughly with a broad flat paddle.
2. Apply with a good quality brush or spray gun.
3. Allow to dry for a minimum of 2 hours.
4. Apply 2nd and 3rd coats as above.

Note: For staining interior timber refer to Cabot's Stain & Varnish Water Based or Cabot's Interior Stain Water Based.

How to apply Cabothane Clear Oil Based

For bare interior timber:
Sand the surface smooth using 180-240 grit sandpaper.

For previously coated interior timber:
Thoroughly clean the surface with Cabot's Floor Clean and allow to dry.
Sand with 180 – 240 grit sandpaper.

Step 1
Surface preparation

Step 2
Apply the coating

1. Stir can thoroughly with a broad flat paddle.
2. Apply with a good quality brush or spray gun.
3. Allow to dry for a minimum of 6 hours.
4. Apply 2nd and 3rd coats as above.

Note: For staining interior timber refer to Cabot's Stain & Varnish Oil Based or Cabot's Interior Stain Oil Based.
Cabot's Wood Tone Putty

**Product description:** Cabot's Wood Tone Putty is an interior putty for use on all interior timber. It fills holes, cracks and blemishes without shrinking.

**Features:**
- Easy to use
- Fast drying
- Grain & hole filler

**Apply with:** Putty knife

**Clean up:** Water

**Use on:** All interior timber

**Chips coated with Cabothane Clear Gloss.**

Cabot's Floor Clean

**Product description:** Cabot's Floor Clean is an all purpose interior timber cleaner that is fast acting on grease and grime.

**Features:**
- Everyday cleaning solution
- Prepares timber for recoat
- Pleasant citrus fragrance

**Coverage:** Up to 60m² per litre

**Apply with:** Floor mop

**Clean up:** Water

**Use on:** All timber finishes, tiles and painted walls

**What is Floor Clean**
An everyday timber floor cleaning solution.

**When to use Floor Clean**
1. For everyday timber floor cleaning.
2. For cleaning interior timber prior to recoat.

Cabot's Floor Polish

**Product description:** Cabot's Floor Polish is a maintenance solution for rejuvenating timber floors. It prolongs the life of timber floor coatings

**Features:**
- Rejuvenates and protects
- Adds shine
- Easy to apply
- Fast drying - 1 hour

**Coverage:** Up to 60m² per litre

**Apply with:** Floor mop

**Number of coats:** 1 coat

**Dry time:** 1 hour

**Clean up:** Water

**Use on:** Previously coated timber, parquetry or cork floors

**What is Floor Polish**
A sacrificial layer that resists knocks and scratches, protecting the timber floor coating below.

**When to use Floor Polish**
Periodically when the appearance of the timber floor coating needs rejuvenating (eg. every 6 months), this will prolong the life of your timber floor coating.

| Coverage:            | Up to 16m² per litre |
| Apply with:          | Brush, 6-10mm nap roller or pad applicator |
| Number of coats:     | 2-3 coats |
| Recoat:              | 12 hours |
| Clean up:            | Mineral Turpentine |
| Use on:              | Solid timber, parquetry, cork & MDF interior flooring |

No sanding required

- No sanding is required for pre-coated timber floors.
- Saves preparation time, cost of sanding and mess.
- See next page for ‘How to’ instructions.

### Cabot’s CFP Hardener

<table>
<thead>
<tr>
<th>Product description:</th>
<th>Cabot’s CFP Hardener is an additive for Cabot’s CFP Floor Oil Based. It speeds the hardening process and wear resistance</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mix ratio:</td>
<td>250ml of CFP Hardener to every 4L of CFP Floor Oil Based</td>
</tr>
</tbody>
</table>
How to recoat your floors with Cabot’s CFP Floor Water Based
No sanding required

Step 1
Test for adhesion
• Apply one coat of CFP Floor Water Based to a small test area.
• Allow to dry for 3 hours.
• Press sticky tape firmly to the surface and pull off quickly.
• If no coating comes off, proceed to step 3.
• If some coating is removed, sand back further to a sound surface.

Step 2
Apply CFP Floor Water Based
• Stir can thoroughly with a broad flat paddle.
• Cut in around the edges of the floor, one section at a time with a good quality synthetic brush.
• Apply along the length of 3-4 boards with a pad applicator or 6-10mm nap roller, keeping a wet edge.
• Allow to dry for 3 hours.
• Apply 2nd coat as above.

Step 3
Cleaning and preparing your timber floor
Bare timber floors or floors with highly visible scratches and imperfections must be sanded smooth using 180-240 grit sandpaper.
• Remove any polish with a suitable floor polish remover. Fill any holes or cracks with Cabot’s Wood Tone Putty after applying the first coat of Cabot’s CFP Floor Water Based for accurate colour matching.
• Thoroughly clean the surface with Cabot’s Floor Clean: mix 2 capfuls of Floor Clean into 4 litres of water.
• Allow to dry.
• For stubborn marks, such as black heal marks caused by shoes: use Cabot’s Floor Clean neat with a rag.

Note – To Stain a Floor
• Previously coated floors must be sanded first.
• Apply chosen colour of Cabot’s Stain & Varnish Water Based as the first coat with a 6-10mm nap roller.
• Top coat with Cabot’s CFP Floor Water Based as above.
How to recoat your floors with Cabot’s CFP Floor Oil Based

Cleaning and preparing your timber floor
- Remove any polish with a suitable floor polish remover or stripper.
- Remove any stains, dirt, wax, grease or oils with mineral turpentine.
- Fill any holes or cracks with Cabot’s Wood Tone Putty after applying the first coat of Cabot’s CFP Floor Oil Based for accurate colour matching.
- Clean previously coated timber with Cabot’s Floor Clean.

Sand your floor
- Sand with 180-240 grit sandpaper and remove all traces of sanding dust.

Apply CFP Floor Oil Based
- Stir can thoroughly with a broad flat paddle.
- Cut in around the edges of the floor, one section at a time with a good quality synthetic brush.
- Apply along the length of 3-4 boards with a pad applicator or 6-10mm nap roller, keeping a wet edge.
- Allow to dry for 12 hours.
- Sand with 240 grit paper, remove all traces of sanding dust.
- Apply 2nd/3rd coats as above.

Note – To Stain a Floor
- Previously coated floors must be sanded first.
- Apply chosen colour of Cabot’s Stain & Varnish Oil Based as the first coat with a 6-10mm nap roller.
- Top coat with Cabot’s CFP Floor Oil Based as above.
### Cabot’s Interior Stain Water Based

**Product description:** Cabot’s Interior Stain Water Based is a penetrating stain for interior doors, windows, trim and furniture. It is easy to use and transforms the natural timber grain.

**Features:**
- Fast recoat - 2 hours
- Enhances timber grain
- Low odour
- No top coat required

**Coverage:** Up to 12m² per litre
**Apply with:** Brush, roller or rag
**Recoat:** 2 hours before applying a top coat
**Top coat required:** Yes - use Cabot’s Cabothane Clear Water Based as a top coat
**Clean up:** Water
**Use on:** Interior timber doors, windows, trim and furniture

### Cabot’s Stain & Varnish Water Based

**Product description:** Cabot’s Stain & Varnish Water Based is a combined stain and varnish for all interior timber. It provides colour and shine without hiding the grain.

**Features:**
- Resists stains & scratches
- Oil enriched
- No top coat required

**Sheen levels available:** Satin or Gloss
**Coverage:** Up to 16m² per litre
**Apply with:** Brush or roller
**Number of coats:** 3 coats
**Recoat:** 8 hours
**Top coat required:** No top coat required
**Clean up:** Mineral Turpentine
**Use on:** All interior timber

*For available colours please refer to pages 12 & 13*
How to Complete an Interior Stain Project

How to apply Cabot’s Stain & Varnish

**Step 1**
**Surface preparation**

For bare and previously coated interior timber:
Sand the surface smooth using 180-240 grit sandpaper.

**Step 2**
**Apply the coating**

1. Stir can thoroughly with a broad flat paddle.
2. Apply Stain & Varnish with a good quality brush or roller.
3. Allow to dry and lightly sand between coats.
4. Apply 2nd and 3rd coats as above.

How to apply Cabot’s Interior Stain

**Step 1**
**Surface preparation**

For bare interior timber:
Sand the surface smooth using 180-240 grit sandpaper.

For previously coated interior timber:
Completely remove the previous coating using a paint stripper or by sanding.

**Step 2**
**Apply the coating**

1. Stir can thoroughly with a broad flat paddle.
2. Apply Interior Stain with a good quality brush, roller or rag.
3. Allow to dry.
4. Apply Cabot’s Cabothane Clear as a top coat.

Stains Clear Top Coats
